

Contents

Chapter 1: Introduction: Obesity and Diabetes	1
• Overview of Obesity and Diabetes	1
• Prevalence and Epidemiology	3
• Causes and Risk Factors	10
Chapter 2: Obesity and Diabetes Pathophysiology	22
• Insulin Signaling, Insulin Resistance in Obesity, and Type 2 Diabetes Mellitus	23
• Role of Adipose Tissue and Inflammation	29
• Metabolic Dysregulation and Hormonal Imbalances	35
• Mechanism of Action of Gut Microbiota in Obesity	48
• Endocrine Cause of Obesity and Diabetes	48
• Endocrine Cause of Diabetes	49
Chapter 3: Genetics of Human Obesity	54
• Heritability and Familial Clustering of Obesity	56
• Heritability Reported in Adoptee Studies	59
• Monogenic and Polygenic Forms of Obesity	62
• Genetic Markers and Variants Associated with Obesity	69
Chapter 4: Clinical Manifestations and Diagnosis	74
• Symptoms and Signs of Obesity and Diabetes	75
• Diagnostic Criteria for Diabetes and Prediabetes	81
• Assessment of Obesity and Comorbidities	83
Chapter 5: Prevention and Lifestyle Interventions	97
• Dietary Strategies for Weight Loss and Glycemic Control	99
• Physical Activity and Exercise Recommendations	105
• Behavioral Modification and Psychological Support	108
Chapter 6: Nutrition and Obesity/Diabetes	115
• Nutrition Transition and Global Dietary Trends	116
Chapter 7: Pharmacotherapy for Diabetes and Obesity	138
• Oral Antidiabetic Agents and Insulin Therapy	140
• Weight Loss Medications and Bariatric Surgery	153
• Combination Therapy and Novel Approaches	162
• Weight Impact of Endocrinotropic Drugs	165

Chapter 8: Management of Diabetes and Obesity Complications	168
• Cardiovascular Disease and Hypertension	170
• Neuropathy, Nephropathy, and Retinopathy	174
• Metabolic Dysfunction-associated Steatotic Liver Disease	188
• Osteoarthritis	192
• Obstructive Sleep Apnea	196
• Malignancies	201
Chapter 9: Special Populations and Issues	206
• Pediatric and Adolescent Obesity and Diabetes	206
• Weight Management of Gestational Diabetes and Pregnancy Management	216
• Diabetes and Obesity In the Elderly and Geriatric Patients	222
• Sarcopenic Obesity	228
• Polycystic Ovary Syndrome	233
• Menopause	236
Chapter 10: Future Directions and Research	242
• New Therapeutic Targets and Approaches	245
• Personalized Medicine and Precision Health	258
• Public Health Strategies and Policy Recommendations	263
Chapter 11: Conclusion	267
• Summary and Implications for Clinical Practice	267
• Challenges and Opportunities for the Future	270
Index	273
